

H-250

COMFORT & FREEDOM

BARTON CONVERTIBLE CHAIR | Mobility means better health

With its 250 lb capacity, the H-250 Convertible Chair provides you a no-lift solution for moving, repositioning and transferring patients in the safest and most dignified manner.

FULLY ADJUSTABLE | Converts to an infinite number of positions

Tilt-in-Space capability makes every H-250 Chair adjustable to any number of positions - easily converting from a stretcher to an upright mobile chair in seconds.

SAVES TIME & ENERGY | Single caregiver transfers made simple

Both patients and caregivers appreciate the freedom to move between a bed and chair with ease. Plus, you'll aid in the promotion of better comfort without unnecessary fear of injury.

LIGHT WEIGHT

So easy to turn and maneuver

REDUCES RISK

Helps to reduce risk of injuries

MINIMIZES PAIN

Minimize pressure ulcers and sores

THE BENEFITS OF THE BARTON H-250 CHAIR

The work required of caregivers has become increasingly dangerous due to the constant demand to move and transfer dependent patients. So, we're determined to:

- + Make your job easier
- + Reduce preventable incidents
- + Help you to enhance the quality of care you can provide
- + Create a more positive patient experience

OPTIONAL ACCESSORIES

OPTION TO ADD:
IV Pole and/or Oxygen Tank Holder

THE SUPPORT YOU NEED

RAISING THE BAR

Our Convertible Chairs used in conjunction with our unique, patented Positioning and Transfer System has set the standard in "no-lift" lateral patient transfers.

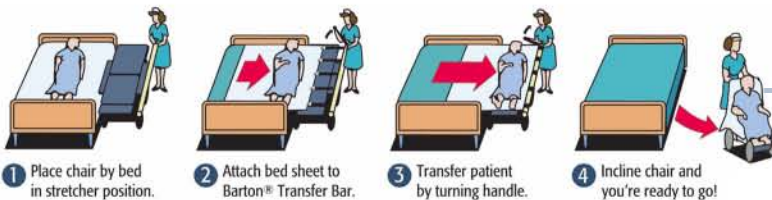

SAFE & SOUND

The PTS provides a safe, comfortable method for moving or positioning non- and limited- ambulatory patients.

PROVEN EFFECTIVE

Tested, utilized and proven highly effective in homes and healthcare facilities across the nation, you'll find our H-250 Chair significantly reduces the risk of injury for both patients and caregivers.

SEE HOW EASY?

MULTI-POSITIONAL

- + Unlimited reclining positions
- + The fully adjustable headrest also includes side support
- + 6 inch casters maneuver easily on wood floors, tile, or carpet
- + Tilt-in-Space capability provides pressure relief

How to Order a Barton H-250 Chair

Patient should meet the following qualifications

- ✓ Must be bedbound
- ✓ Is unable to transfer on their own
- ✓ Cannot tolerate a Hoyer type lift
- ✓ Requires supine/lateral transfers

Including an Rx is not necessary, but it can help to expedite the process.
